Library of Congress Cataloging-in-Publication Data

The cover figure shows one of the first applications of seismic interferometry, applied to solar oscillations. The figure is a compilation of figures from a 1999 paper by Rickett and Claerbout in *THE LEADING EDGE* (Vol. 18, pp. 957–960). The full paper can be found in Chapter 3: Highlights of Seismic Interferometry until 2003.

Table of Contents

About the Editors	xi
Chapter 1 Introduction	1
Acknowledgments	3
References	3
Suggestions for further reading	3
Chapter 2 Seismic Interferometry without Equations	9
GEOPHYSICS bright spots	10
<i>Stephen J. Hill, 2006, THE LEADING EDGE, 25, 1078–1081.</i>	
Seismic interferometry — Turning noise into signal	14
<i>Andrew Curtis, Peter Gerstoft, Haruo Sato, Roel Snieder, and Kees Wapenaar, 2006, THE LEADING EDGE, 25, 1082–1092.</i>	
Virtual surface seismic data from downhole passive arrays	23
<i>Gerard Schuster, 2006, EAGE Workshop, Passive Seismic: Exploration and Monitoring Applications, A24.</i>	
Virtual source applications to imaging and reservoir monitoring	29
<i>A. Bakulin, A. Mateeva, K. Mehta, P. Jorgensen, J. Ferrandis, I. Sinha Herhold, and J. Lopez, 2007, THE LEADING EDGE, 26, 732–740.</i>	
From order to disorder to order: A philosophical view on seismic interferometry	37
<i>Kees Wapenaar and Roel Snieder, 2007, 77th Annual International Meeting, SEG, Expanded Abstracts, 2683–2687.</i>	
Chapter 3 Highlights of Seismic Interferometry until 2003	43
Synthesis of a layered medium from its acoustic transmission response	44
<i>Jon F. Claerbout, 1968, GEOPHYSICS, 33, 264–269.</i>	
Levinson inversion of earthquake geometry SH-transmission seismograms in the presence of noise	50
<i>F. Scherbaum, 1987, Geophysical Prospecting, 35, no. 7, 787–802.</i>	
Time reversed acoustics	66
<i>Mathias Fink, 1997, Physics Today, 50, 34–40.</i>	
Acoustic daylight imaging via spectral factorization: Helioseismology and reservoir monitoring	73
<i>James Rickett and Jon Claerbout, 1999, THE LEADING EDGE, 18, 957–960.</i>	

Theory of daylight/interferometric imaging: Tutorial	77
<i>Gerard T. Schuster</i> , 2001, 63rd Annual Conference and Exhibition, EAGE, Extended Abstracts, A-032.	
On the emergence of the Green's function in the correlations of a diffuse field	81
<i>Oleg I. Lobkis and Richard L. Weaver</i> , 2001, Journal of the Acoustical Society of America, 110 , no. 6, 3011–3017.	
Long-range correlations in the diffuse seismic coda	88
<i>Michel Campillo and Anne Paul</i> , 2003, Science, 299 , 547–549.	
Short Note — Synthesis of an inhomogeneous medium from its acoustic transmission response	91
<i>Kees Wapenaar</i> , 2003, GEOPHYSICS, 68 , 1756–1759.	
Recovering the Green's function from field-field correlations in an open scattering medium (L)	95
<i>Arnaud Derode, Eric Larose, Mickael Tanter, Julien de Rosny, Arnaud Tourin, Michel Campillo, and Mathias Fink</i> , 2003, Journal of the Acoustical Society of America, 113 , no. 6, 2973–2976.	
Chapter 4 Green's Function Reconstruction	99
Introduction	99
Diffuse wavefields	99
Deterministic wavefields	100
Diffuse fields in ultrasonics and seismology	102
<i>Richard L. Weaver and Oleg I. Lobkis</i> , 2006, GEOPHYSICS, 71 , no. 4, SI5–SI9.	
Extracting the Green's function from the correlation of coda waves:	
A derivation based on stationary phase	107
<i>Roel Snieder</i> , 2004, Physical Review E, 69 , 046610.	
P-waves from cross-correlation of seismic noise	115
<i>Philippe Roux, Karim G. Sabra, Peter Gerstoft, W. A. Kuperman, and Michael C. Fehler</i> , 2005, Geophysical Research Letters, 32 , L19303.	
Correlation of random wavefields: An interdisciplinary review	119
<i>Eric Larose, Ludovic Margerin, Arnaud Derode, Bart van Tiggelen, Michel Campillo, Nikolai Shapiro, Anne Paul, Laurent Stehly, and Mickael Tanter</i> , 2006, GEOPHYSICS, 71 , no. 4, Seismic Interferometry supplement, SI11–SI21.	
Green's functions extraction and surface-wave tomography from microseisms in southern California	130
<i>Peter Gerstoft, Karim G. Sabra, Philippe Roux, W. A. Kuperman, and Michael C. Fehler</i> , 2006, GEOPHYSICS, 71 , no. 4, Seismic Interferometry supplement, SI23–SI31.	
Passive image interferometry and seasonal variations of seismic velocities at Merapi Volcano, Indonesia	139
<i>C. Sens-Schönfelder and U. Wegler</i> , 2006, Geophysical Research Letters, 33 , L21302.	

Retrieval of reflections from seismic background-noise measurements	144
<i>Deyan Draganov, Kees Wapenaar, Wim Mulder, Johannes Singer, and Arie Verdel, 2007, Geophysical Research Letters, 34, L04305.</i>	
Nonreciprocal Green’s function retrieval by cross correlation.	148
<i>Kees Wapenaar, 2006, Journal of the Acoustical Society of America, 120, no. 1, EL7–EL13.</i>	
Extracting the Green’s function of attenuating heterogeneous acoustic media from uncorrelated waves.	155
<i>Roel Snieder, 2007, Journal of the Acoustical Society of America, 121, no. 5, 2637–2643.</i>	
Emergence of the acoustic Green’s function from thermal noise.	162
<i>Oleg A. Godin, 2007, Journal of the Acoustical Society of America, 121, no. 2, EL96–EL102.</i>	
Unified Green’s function retrieval by cross-correlation: Connection with energy principles. . . .	169
<i>Roel Snieder, Kees Wapenaar, and Ulrich Wegler, 2007, Physical Review E, 75, 036103.</i>	
Consistency of the spatial autocorrelation method with seismic interferometry and its consequence.	183
<i>Toshiaki Yokoi and Sos Margaryan, 2008, Geophysical Prospecting, 56, 435–451.</i>	
Green’s function representations for seismic interferometry	200
<i>Kees Wapenaar and Jacob Fokkema, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI33–SI46.</i>	
Interferometric modeling of wave propagation in inhomogeneous elastic media using time reversal and reciprocity	214
<i>Dirk-Jan van Manen, Andrew Curtis, and Johan O. A. Robertsson, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI47–SI60.</i>	
Seismic interferometry: Reconstructing the earth’s reflection response	228
<i>Deyan Draganov, Kees Wapenaar, and Jan Thorbecke, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI61–SI70.</i>	
Removing free-surface multiples from teleseismic transmission and constructed reflection responses using reciprocity and the inverse scattering series	238
<i>Chengliang Fan, Gary L. Pavlis, Arthur B. Weglein, and Bogdan G. Nita, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI71–SI78.</i>	
Unified Green’s function retrieval by cross correlation.	246
<i>Kees Wapenaar, Evert Slob, and Roel Snieder, 2006, Physical Review Letters, 97, 234301.</i>	
On estimating the impulse response between receivers in a controlled ultrasonic experiment	250
<i>K. van Wijk, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI79–SI84.</i>	
Seismic interferometry with a TBM source of transmitted and reflected waves	256
<i>Flavio Poletto and Lorenzo Petronio, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI85–SI93.</i>	
Improved Green’s functions for passive-source structural studies	265
<i>Jean-Philippe Mercier, Michael G. Bostock, and Adam M. Baig, 2006, Geophysics, 71, no. 4, Seismic Interferometry supplement, SI95–SI102.</i>	

Transmission to reflection transformation of teleseismic wavefields	273
<i>M. Ravi Kumar and M. G. Bostock, 2006, Journal of Geophysical Research, 111, B08306.</i>	
Application of seismic interferometry to natural earthquakes	
measured by small-scale array.	282
<i>Kentaro Torii, Toshifumi Matsuoka, Kyosuke Onishi, Kazuya Shiraishi, Takao Aizawa, Yoshiaki Yamanaka, Syunichiro Ito, Toshinori Kimura, Youichi Asano, and Tetsuya Takeda, 2007, 77th Annual International Meeting, SEG, Expanded Abstracts, 1362–1366.</i>	
Interferometric prediction and least squares subtraction of surface waves	287
<i>Shuqian Dong, Reiqing He, and Gerard T. Schuster, 2006, 76th Annual International Meeting, SEG, Expanded Abstracts, 2783–2786.</i>	
Interferometric surface-wave isolation and removal	291
<i>David F. Halliday, Andrew Curtis, Johan O. A. Robertsson, and Dirk-Jan van Manen, 2007, GEOPHYSICS, 72, no. 5, A69–A73.</i>	
On the relation between seismic interferometry and the migration resolution function	296
<i>Jan Thorbecke and Kees Wapenaar, 2007, GEOPHYSICS, 72, no. 6, T61–T66.</i>	
Electromagnetic Green’s functions retrieval by cross-correlation and cross-convolution in media with losses	302
<i>Evert Slob and Kees Wapenaar, 2007, Geophysical Research Letters, 34, L05307.</i>	
Global-scale seismic interferometry: Theory and numerical examples.	307
<i>Elmer Ruigrok, Deyan Draganov, and Kees Wapenaar, 2008, Geophysical Prospecting, 56, 395–417.</i>	
Chapter 5 Redatuming	331
Introduction	331
Fermat’s interferometric principle for target-oriented travelt ime tomography.	333
<i>Gerard T. Schuster, 2005, GEOPHYSICS, 70, no. 4, U47–U50.</i>	
The virtual source method: Theory and case study	337
<i>Andrey Bakulin and Rodney Calvert, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI139–SI150.</i>	
On the fundamentals of the virtual source method	349
<i>Valeri Korneev and Andrey Bakulin, 2006, GEOPHYSICS, 71, no. 3, A13–A17.</i>	
A theoretical overview of model-based and correlation-based redatuming methods.	354
<i>Gerard T. Schuster and Min Zhou, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI103–SI110.</i>	
Redatuming CDP data below salt with VSP Green’s function	362
<i>Xiang Xiao and Gerard T. Schuster, 2006, 76th Annual International Meeting, SEG, Expanded Abstracts, 3511–3515.</i>	
Spurious multiples in seismic interferometry of primaries.	367
<i>Roel Snieder, Kees Wapenaar, and Ken Larner, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI111–SI124.</i>	

Using the inverse scattering series to predict the wavefield at depth and the transmitted wavefield without an assumption about the phase of the measured reflection data or back propagation in the overburden.	381
<i>A. B. Weglein, B. G. Nita, K. A. Innanen, E. Otnes, S. A. Shaw, F. Liu, H. Zhang, A. C. Ramírez, J. Zhang, G. L. Pavlis, and C. Fan, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI125–SI137.</i>	
Equivalence of the virtual-source method and wave-field deconvolution in seismic interferometry.	394
<i>Roel Snieder, Jon Sheiman, and Rodney Calvert, 2006, Physical Review E, 73, 066620.</i>	
Interferometry in dissipative media: Addressing the shallow sea problem for seabed logging applications.	403
<i>Evert Slob, Kees Wapenaar, and Roel Snieder, 2007, 77th Annual International Meeting, SEG, Expanded Abstracts, 559–563.</i>	
Virtual shear source makes shear waves with air guns	408
<i>Andrey Bakulin, Alben Mateeva, Rodney Calvert, Patsy Jorgensen, and Jorge Lopez, 2007, GEOPHYSICS, 72, no. 2, A7–A11.</i>	
Improving the virtual source method by wavefield separation.	413
<i>Kurang Mehta, Andrey Bakulin, Jonathan Sheiman, Rodney Calvert, and Roel Snieder, 2007, GEOPHYSICS, 72, no. 4, V79–V86.</i>	
Cross-well seismic survey without borehole source	421
<i>S. Minato, K. Onishi, T. Matsuoka, Y. Okajima, J. Tsuchiyama, D. Nobuoka, H. Azuma, and T. Iwamoto, 2007, 77th Annual International Meeting, SEG, Expanded Abstracts, 1357–1361.</i>	
Acquisition geometry requirements for generating virtual-source data	426
<i>Kurang Mehta, Roel Snieder, Rodney Calvert, and Jonathan Sheiman, 2008, THE LEADING EDGE, 27, 620–629.</i>	
Interferometry by deconvolution: Part 1 — Theory for acoustic waves and numerical examples	434
<i>Ivan Vasconcelos and Roel Snieder, 2008, GEOPHYSICS, 73, no. 3, S115–S128.</i>	
Chapter 6 Imaging	449
Introduction	449
Diffuse wavefields	450
Deterministic wavefields	451
References	452
Time-reversal acoustics in complex environments	454
<i>Mathias Fink, 2006, GEOPHYSICS, 71, no. 4, Seismic Interferometry supplement, SI151–SI164.</i>	
Coherent interferometric imaging in clutter	468

3D wave-equation interferometric migration of VSP free-surface multiples	620
<i>Ruiqing He, Brian Hornby, and Gerard Schuster, 2007, GEOPHYSICS, 72, no. 5, S195–S203.</i>	

About the Editors

Kees Wapenaar has been professor of applied geophysics at Delft University of Technology in the Netherlands since 1999 and is the 2007–2009 SEG editor. From 1986 until 1999, he was associate professor and one of the project leaders of the DELPHI consortium, a project on seismic imaging and characterization. His main research interests are wave theory and its applications in geophysical imaging and characterization, multicomponent seismics, and seismic interferometry. He has published one book and 99 journal papers on those subjects. Wapenaar's research in seismic interferometry started in 2002. He coedited a supplement of *GEOPHYSICS* (2006, the basis for this reprint book) and a special issue of *Geophysical Prospecting* (2008) on interferometry and related subjects. He coorganized several workshops and special sessions at SEG, AGU, EAGE, and SEGJ conventions. He received two awards from SEG in 2006, for best paper in *GEOPHYSICS* and honorable mention for best paper in *THE LEADING EDGE*, both on seismic interferometry.

Wapenaar received an M.Sc. in 1981 and a Ph.D. in 1986, both in applied physics at Delft.

Deyan Draganov has been an associate editor of *GEOPHYSICS* since 2005. His main research interests are wave propagation and seismic interferometry. His research in seismic interferometry started in 2002, and he has published seven articles on that subject. He coedited a supplement of *GEOPHYSICS* in 2006 which is the basis for this reprint book. He received an award for best student poster paper at the SEG annual meeting in 2003.

Draganov received an M.Sc. in 2002 and a Ph.D. in 2007. He is a postdoctoral research fellow in the section of applied geophysics and petrophysics at Delft University of Technology in the Netherlands.

Johan O. A. Robertsson joined Schlumberger Cambridge Research in 1996. He has held different positions in Schlumberger and WesternGeco and is now research director of geophysics at Schlumberger Cambridge Research. His research interests include theory and modeling of wave propagation, seismic interferometry, and seismic data acquisition and processing. On those subjects, he has published book chapters and 42 papers in peer-reviewed journals. He coedited a supplement of *GEOPHYSICS* (2006) which is the basis for this reprint book. Robertsson is an assistant editor of *GEOPHYSICS* and an associate editor of *Geophysical Journal International*. He is a member of SEG, EAGE, and AGU.

Robertsson received an M.Sc. in engineering physics from Uppsala University, Sweden, in 1991 and a Ph.D. in geophysics from Rice University, Houston, Texas, in 1994. He was a postdoctoral research fellow at the Institute of Geophysics at the Swiss Federal Institute of Technology (ETH) in Zurich in 1995–1996.
